

The Society for Clinical Child and Adolescent Psychology (SCCAP): Initiative for Dissemination of Evidence-based Treatments for Childhood and Adolescent Mental Health Problems

With additional support from Florida International University and The Children's Trust.

Workshop

Linking the Interests of Families and Teachers (LIFT): A Brief School-Based Preventive Intervention Targeting Youth Problem Behaviors

J. Mark Eddy, Ph.D., ABPP

Research Scientist, School of Social Work

Director of Research for Partners for Our Children

University of Washington

Today

Session 1. Background

Session 2. Parent Directed Components

Session 3. Child Directed Components

Session 4. Putting It All Together

LIFT

Session 1. Background

What is an evidence-based program?

Typical Definition

- Randomized controlled trial(s)
- Defined sample from a population
- Acceptable recruitment rates
- Large sample size
- Implementation quality
- Participant retention
- Long term follow-up
- Appropriate analyses

Typical Intervention

- Targets behavior and/or cognitions
- Works with one person or unit
- Relatively brief

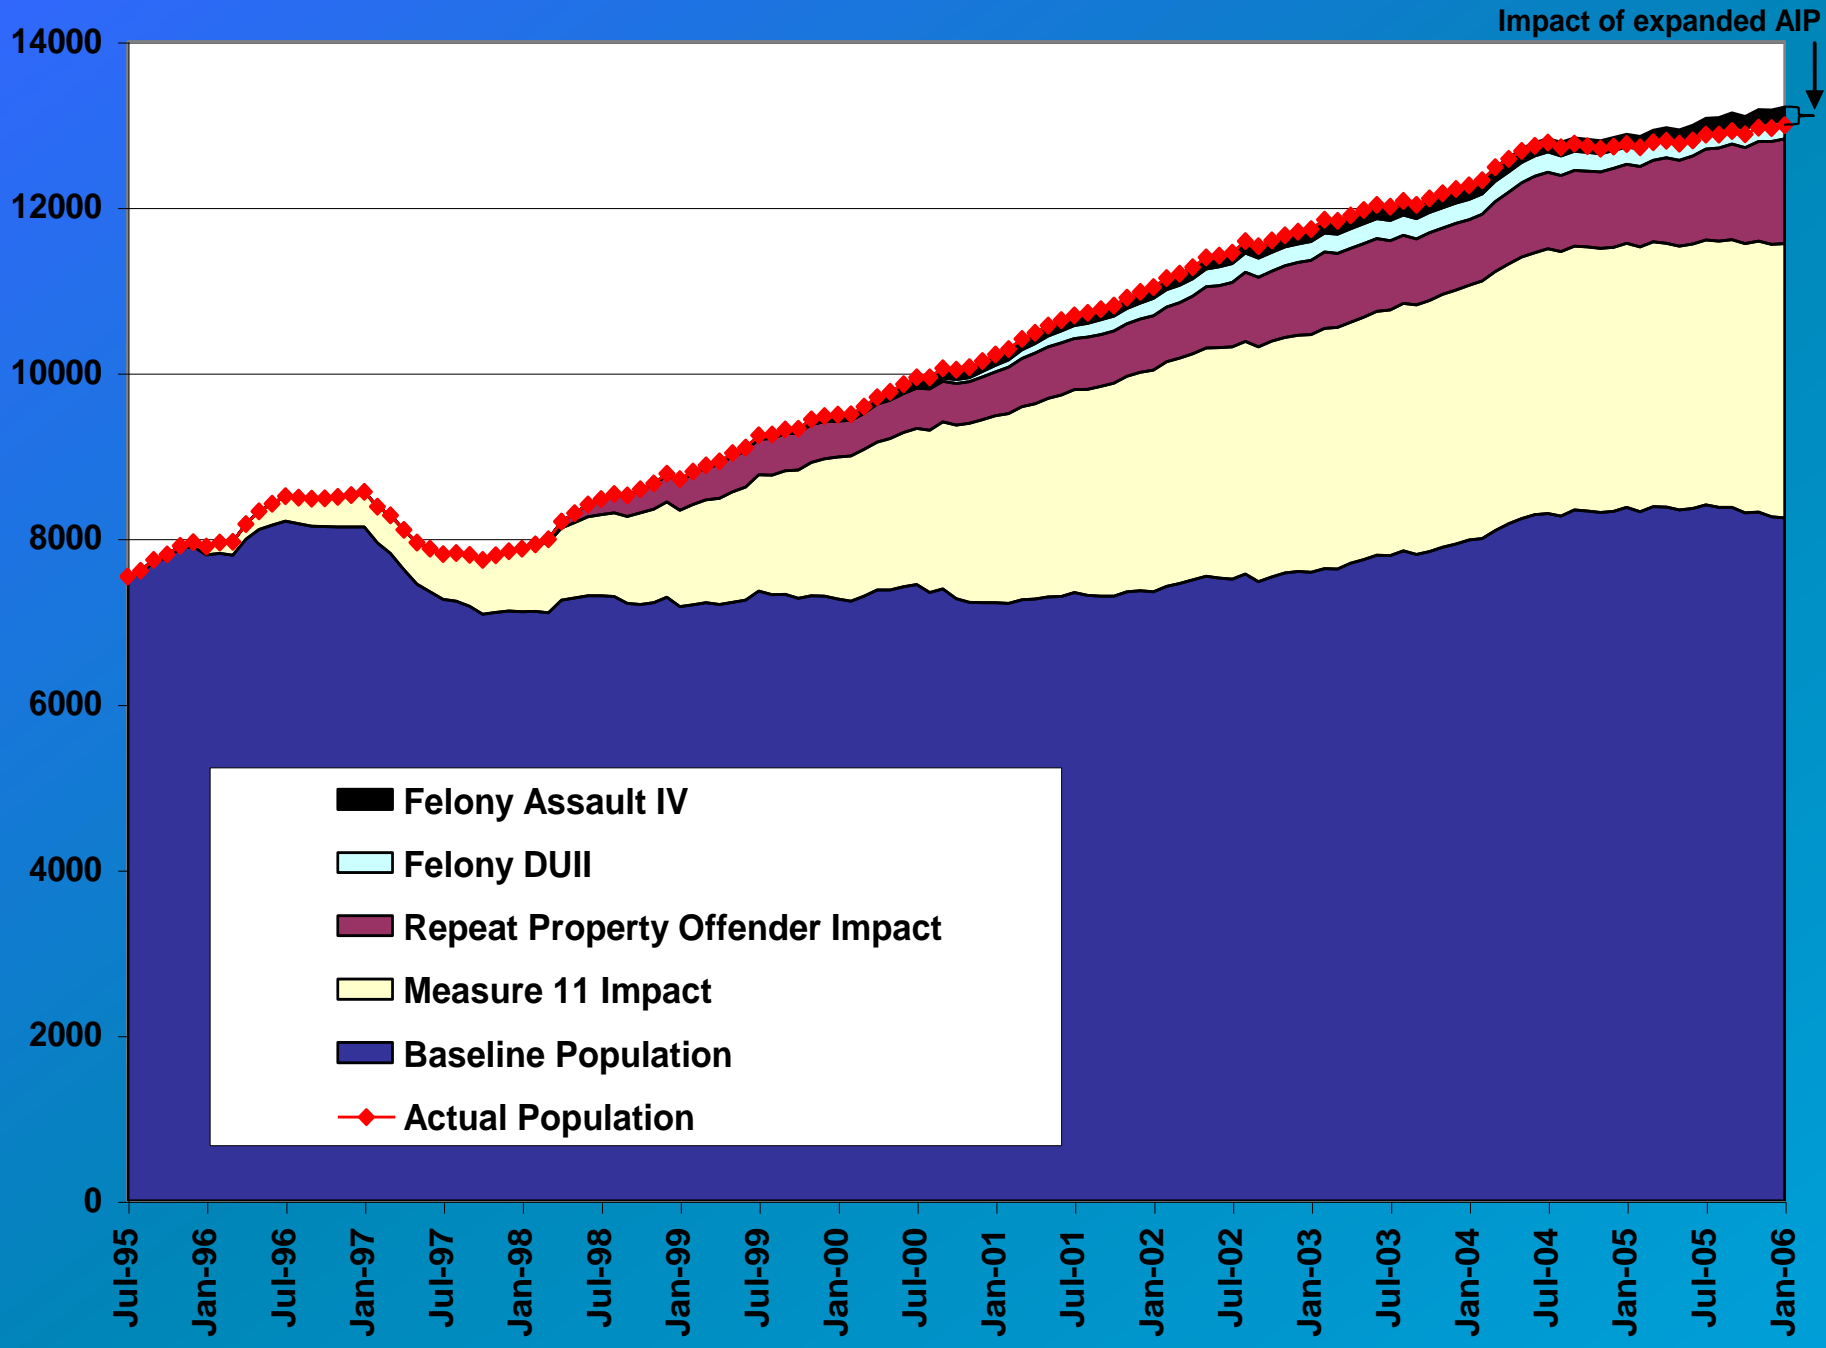

Various labels and ratings, but ALL simply indicate some evidence of promise, not certainty of success.

Conduct Disorder

- Persistent and serious antisocial behavior during youth
 - Some antisocial behaviors common during certain stages of life
- Risk for future adjustment
 - Substance abuse
 - Violent, dysfunctional relationships
 - Incarceration
 - Disenfranchisement
 - Unemployment
 - Parenting problems

\$100 Billion Per Year

- Mental health and well being
- Physical health and well being
- ER visits and hospitalizations
- Property loss and damage
- Police and fire
- Legal
- Incarceration

Prevention

- Intervention before start of a diagnosable problem
- Universal or primary – directed at everyone, regardless of current levels of problems

Linking the Interests of Families
and Teachers
(LIFT)

Prevention

- LIFT is an universal or primary prevention program.
- The program is grounded in systematic research conducted with parents and families over the past 50 years.
- The primary inspiration for the components of LIFT comes from the work of Gerald R. Patterson, John B. Reid, and colleagues at the Oregon Social Learning Center.

A Typical Case

- 8 year-old boy
- Having trouble at home
- Having trouble at school
- Parent feels has tried everything
- Don't know what to do

1950s

- *Work took place at the University of Oregon (UO)*
- Child Guidance Clinic
- Child Study Center
 - Play therapy
 - Psychoanalytically-based
 - Child focused
 - Didn't seem to work for typical case
 - Needed new model

1960s

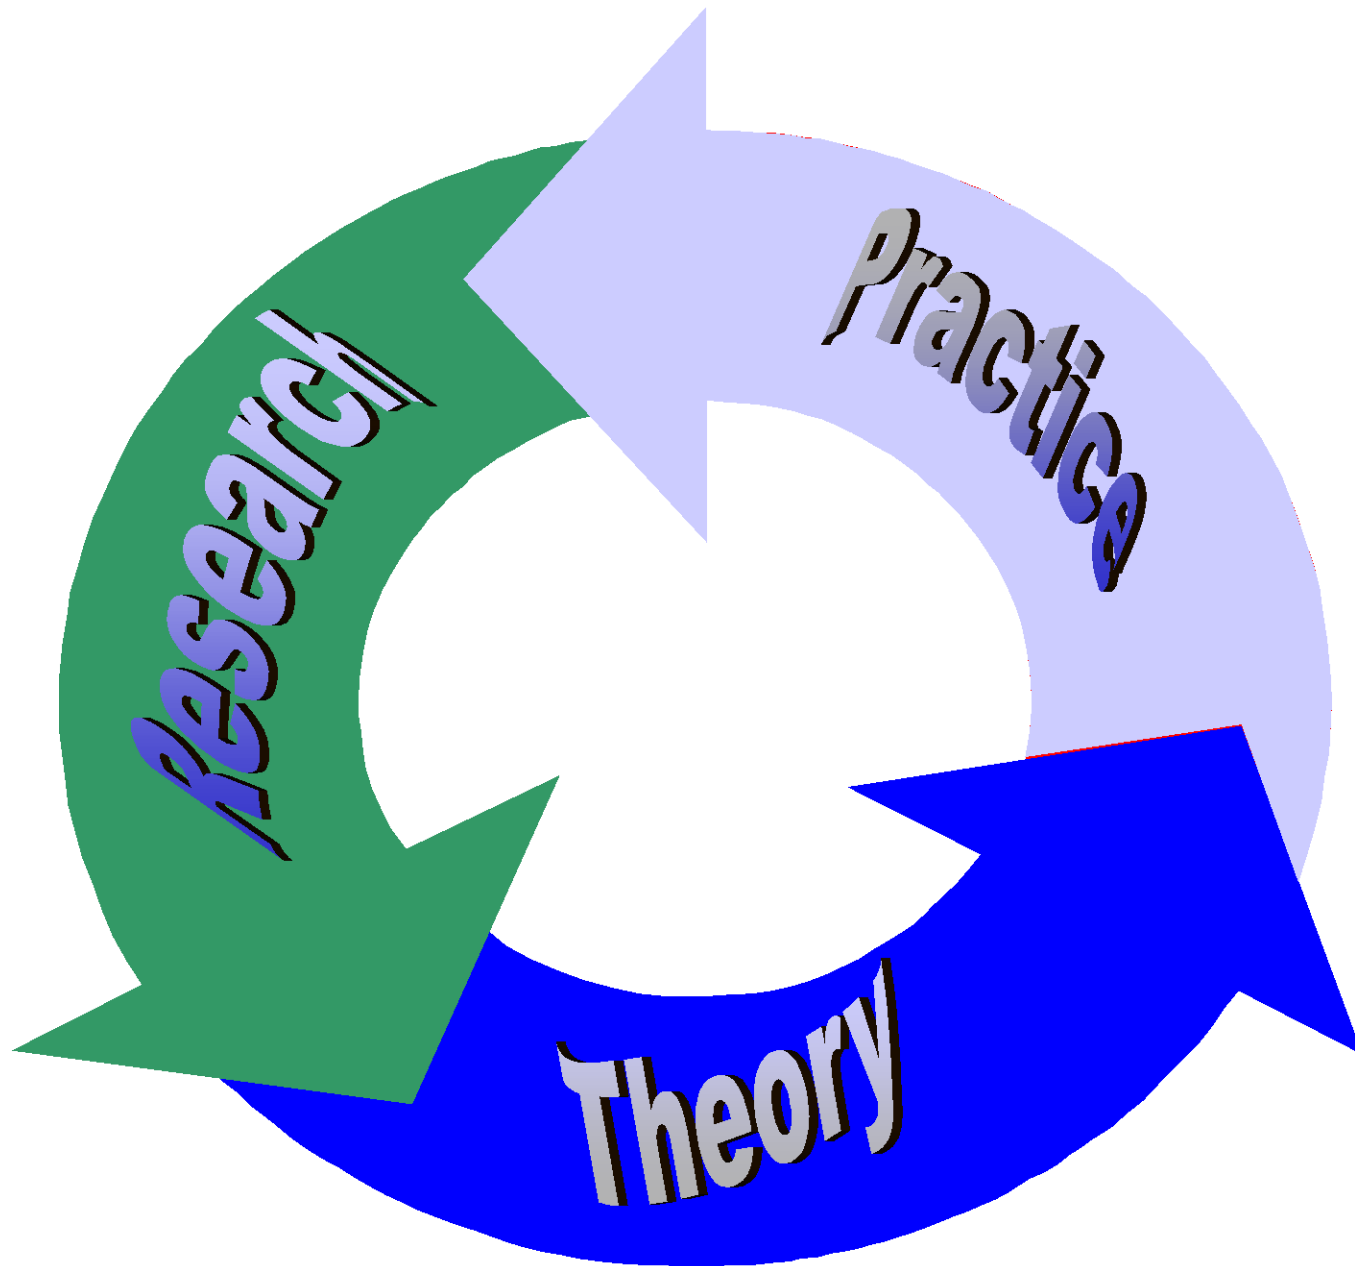

- *Work took place at the UO and the non-profit Oregon Research Institute*
- Back to the drawing board
- Basic research
 - Conclusion that problem not just inside the child -- what is going in the environments that surround the child matters
 - What parents, teachers, and other adults do can change what a child does
- Case studies

Video:

A Social Learning Approach to Family Therapy

Expanding a Theory

- *Work took place at the non-profit Oregon Social Learning Center*
- 1970s onward: Longitudinal studies
- 1980s: Intervention studies: Juvenile justice, child welfare, and mental health systems
- 1990s: Intervention studies: School system, community-based non-profits
- 2000s: Intervention studies: Criminal justice system; early childhood intervention; communities, states, countries

Treatment Care (2-4)

POSITIVE PARENTING PRACTICES

Skills Encouragement

Positive Involvement

Effective Discipline

Problem-solving

Monitoring / Supervision

NEGATIVE PARENTING PRACTICES

Negative Reciprocity

Escalation

Negative Reinforcement

CHILD OUTCOMES

Arrest Rates / Severity
of Crime

Substance Use

Noncompliance

Delinquent Behaviors

Academic Function

Out of Home Placement

Deviant Peer
Associations

Depression

PARENT OUTCOMES

Depression

Standard of living

Arrest rates

Marital adjustment

Marital satisfaction

Impacts

Parents

- Parenting practices
- Parent depression
- Parent criminality
- Marital adjustment

Children

- Aggression
- Delinquency
- Substance use
- Depression
- Deviant peer association

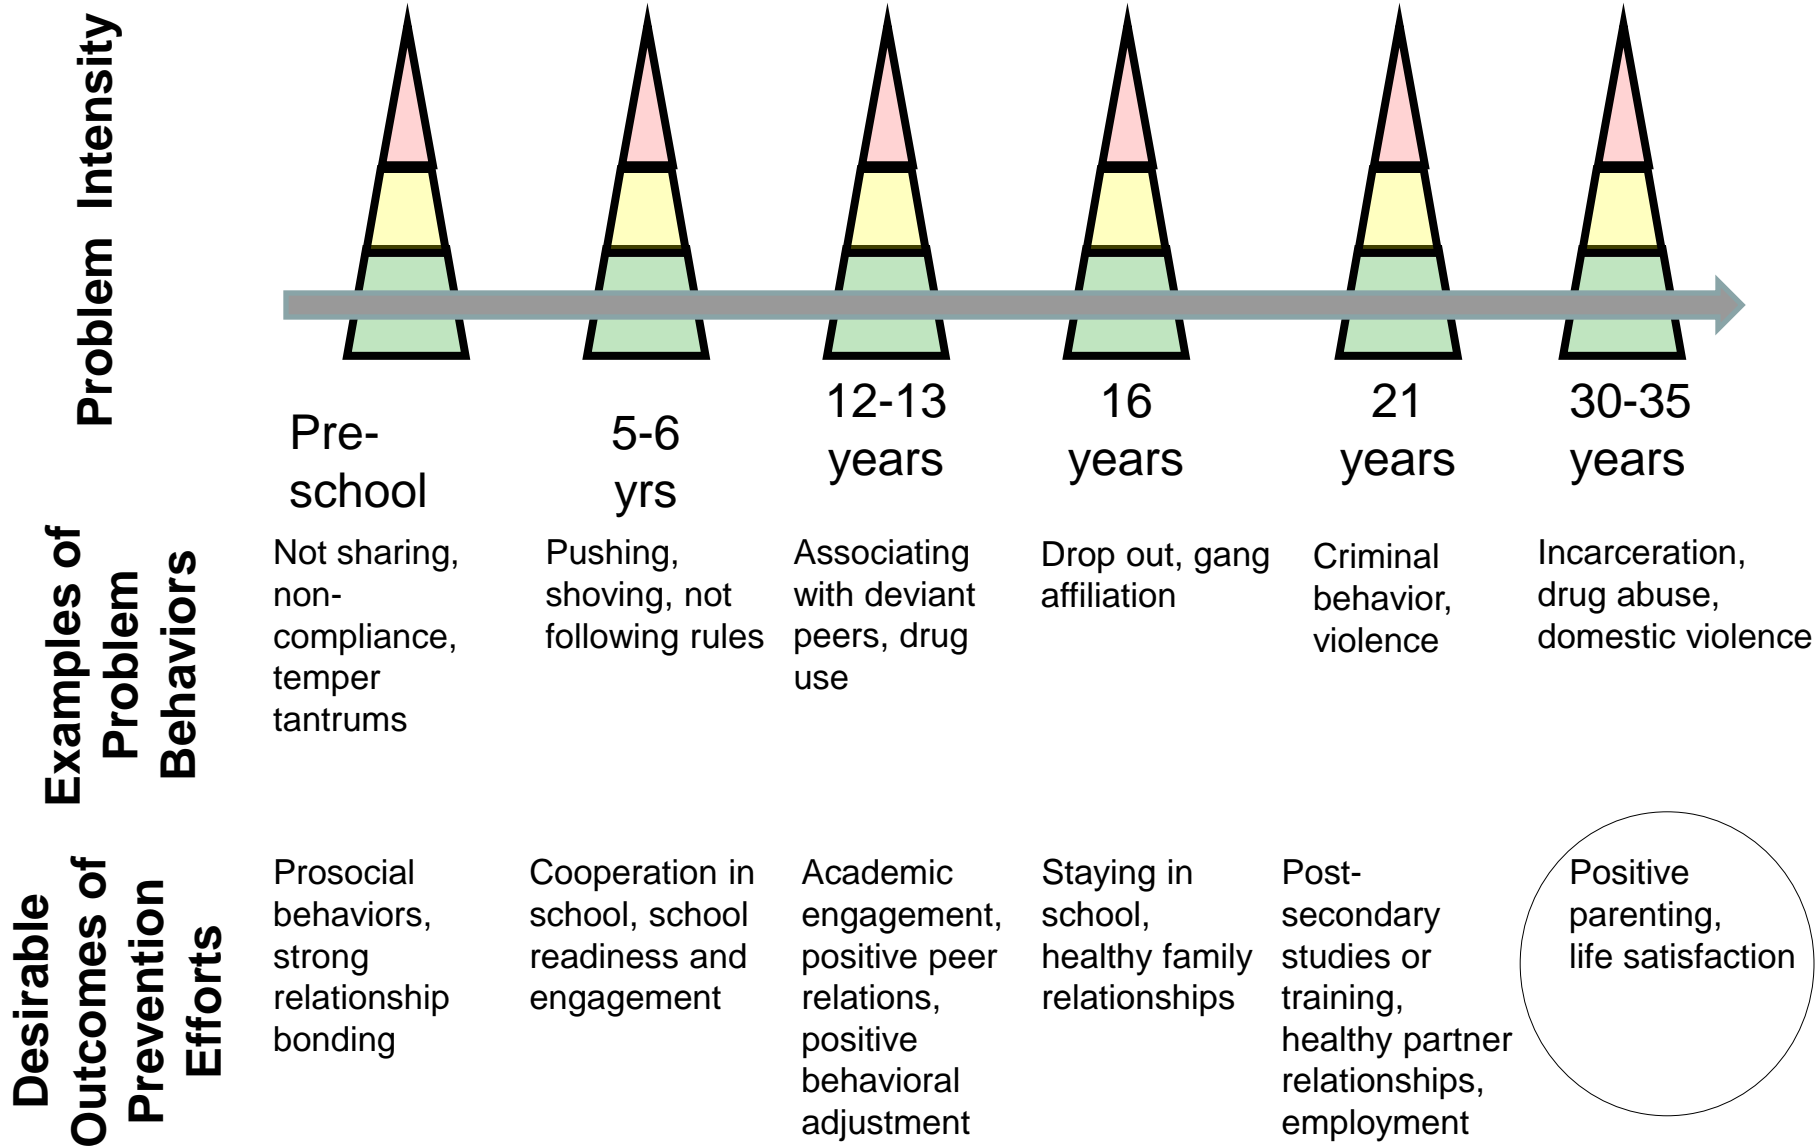

Parent Management Training

- Empowering parents with core strategies
 - Skill Encouragement
 - Limit Setting
 - Monitoring/supervision
 - Family Problem Solving
 - Positive Involvement
- Considered one of two “well established” treatments for conduct disorder (American Psychological Association)

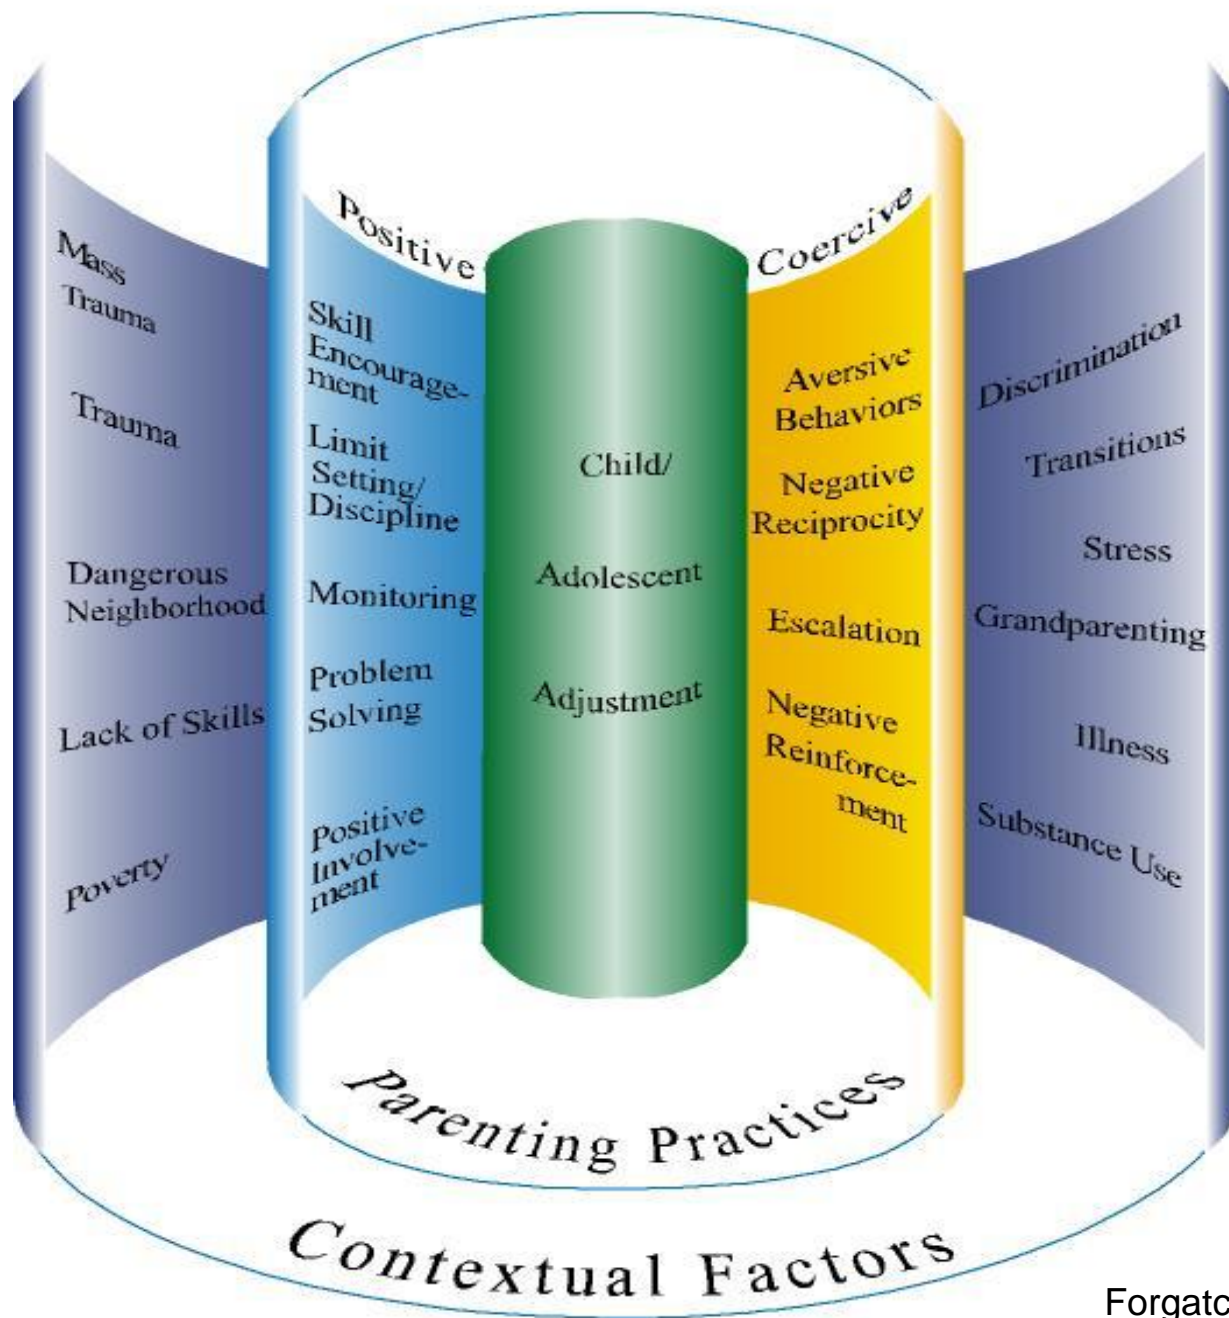

Family-Based Programs on 3 or More Federal “Best Practices” Lists

Classification	Percent	Cumulative Percent
Developed at OSLC	23%	
Derived from OSLC	23%	56%
Includes many OSLC elements	33%	81%
Few or no OSLC elements	19%	

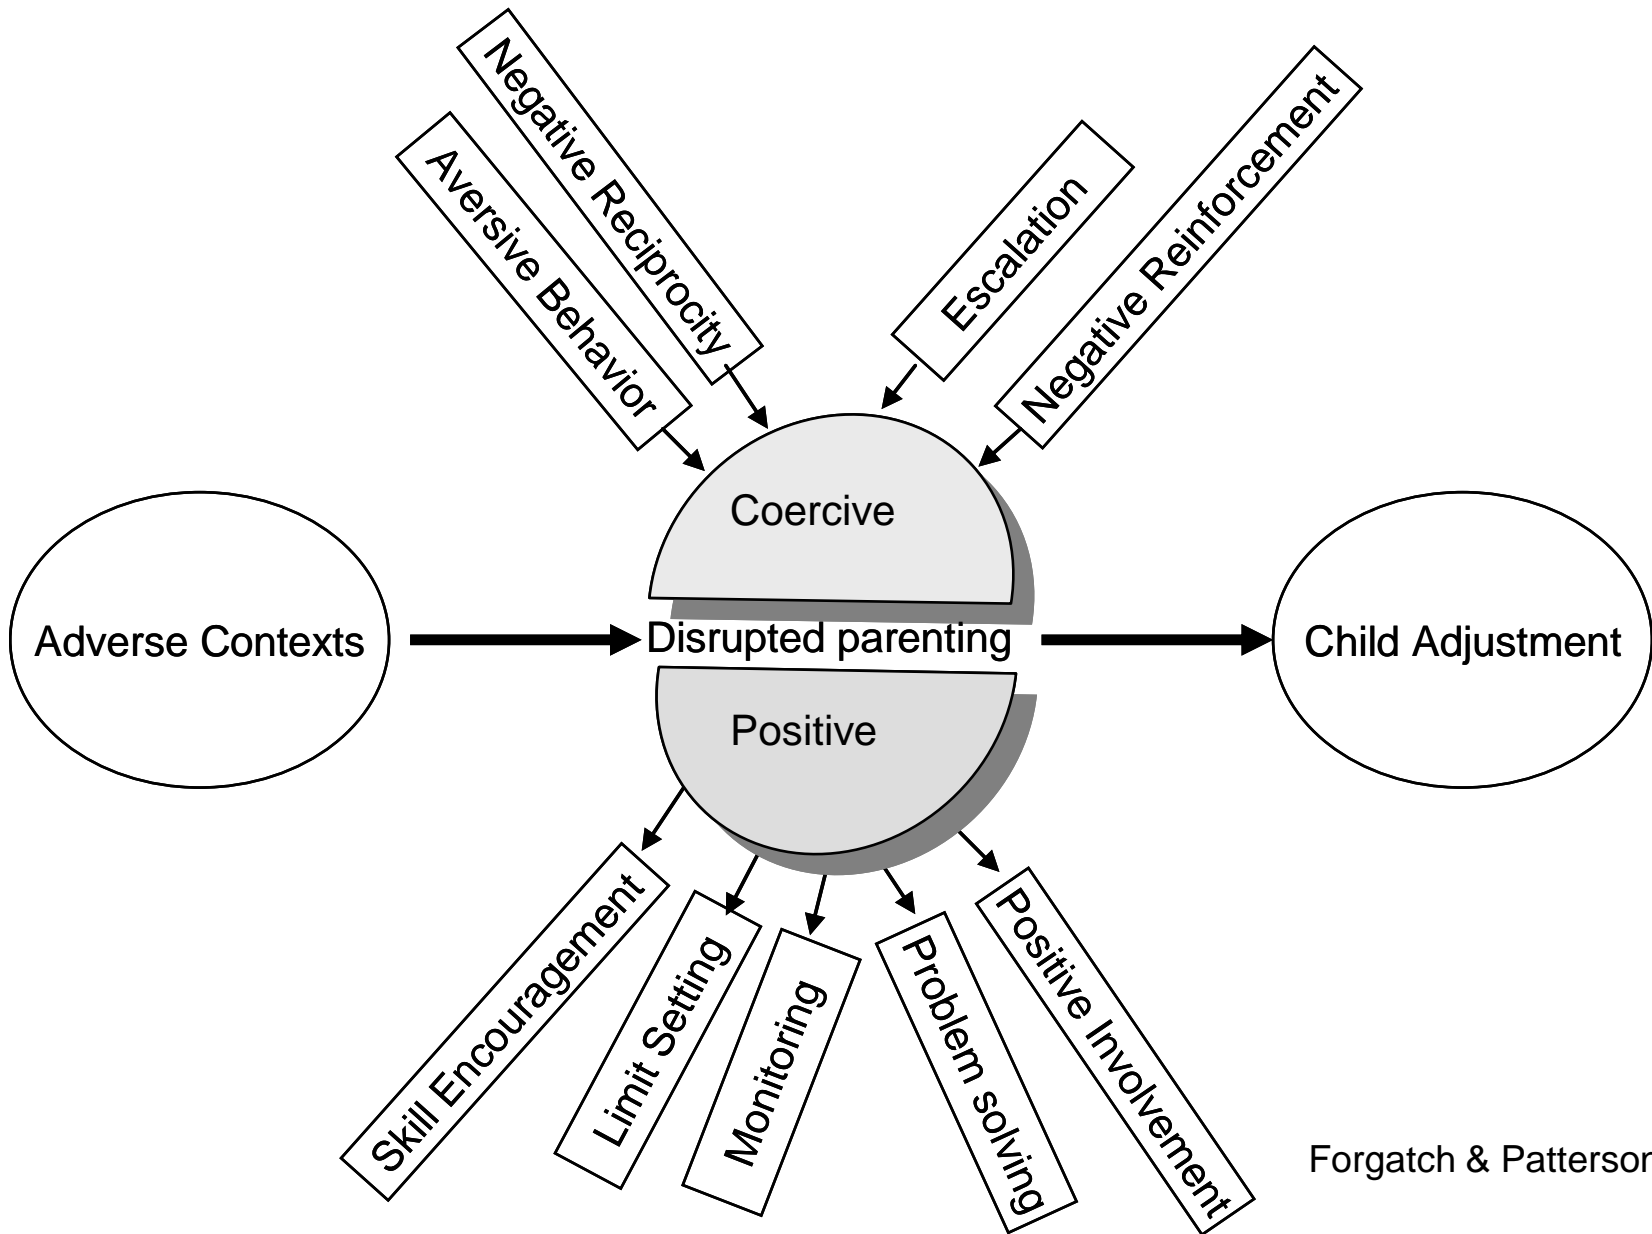

Prevention Along the Developmental Continuum

A Social Interactional Learning Model

Social Interaction Learning Model

Theory of Action

Multilevel Intervention

- Spending positive, quality time with children
- Encouraging participation in normative behaviors/activities, teaching in small steps
- Providing consistent, mild, small, nonviolent consequences for problem behaviors

Multilevel Intervention (cont.)

- Monitoring of daily activities inside and outside home; supervising who, what, where, when
- Goal setting, interpersonal planning, negotiating, trying out agreements
- Separating child from delinquent peers, encouraging relationships with prosocial peers

Social and Emotional Learning

- Develop abilities to recognize and manage emotions
- Set and achieve prosocial goals
- Appreciate the points of view of others
- Make good, responsible decisions
- Establish and maintain happy interpersonal relationships with family, peers, others

Video:
Developing LIFT

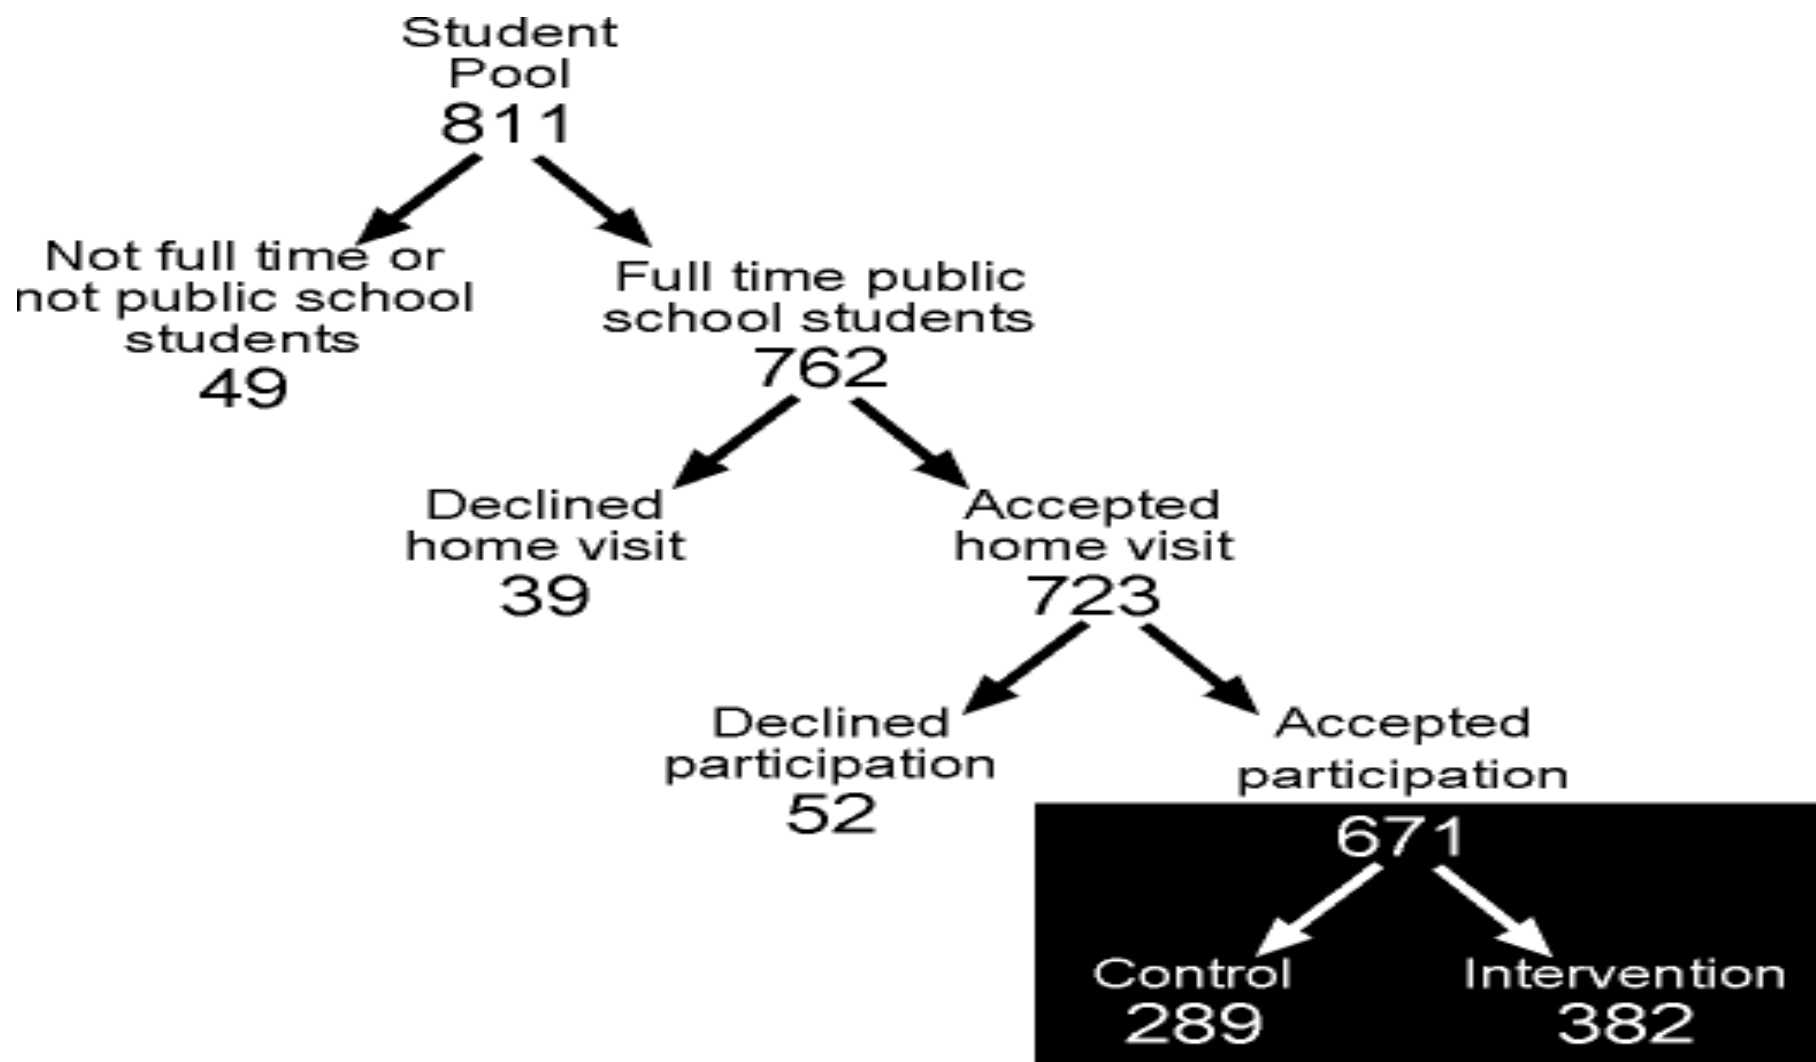

Home and School: 10 Weeks

- Parent Directed Components
 - Parent Management Training
 - School-Home Communication
- Child Directed Components
 - Child Social Skills and Problem Solving Training
 - Playground “Good Behavior Game”

Research Design

- Randomized Controlled Trial
 - 12 public schools located in high delinquency neighborhoods (based on local norms)
 - 6 intervention versus 6 control schools
 - Randomize schools, recruit participants, follow-up
 - Target included all children in 1st-2nd, or all children in 4th-5th grade classes, within a school
 - Multiagent assessments yearly
 - Parent(s)
 - Teacher
 - Child
 - Official records (school, juvenile court)

83% of children residing in neighborhood

88% of full-time public school students

93% of families who accepted a home visit

Sample

- Community
 - 200,000+ people
 - Urban area in county size of Connecticut
 - Timber, agriculture, university (Pacific Northwest)
- Schools
 - Average police contact rate 13%
 - Average free/reduced lunch 47%
 - Average yearly turnover rate 43%
- Participants ($N = 671$, boys and girls)
 - 89% White
 - Low to middle income; 20% public assistance
 - 54% two-parent families

Implementation Quality

- Majority of families received the program
- Majority of planned program delivered
- Program instructors delivered using appropriate skills most of the time

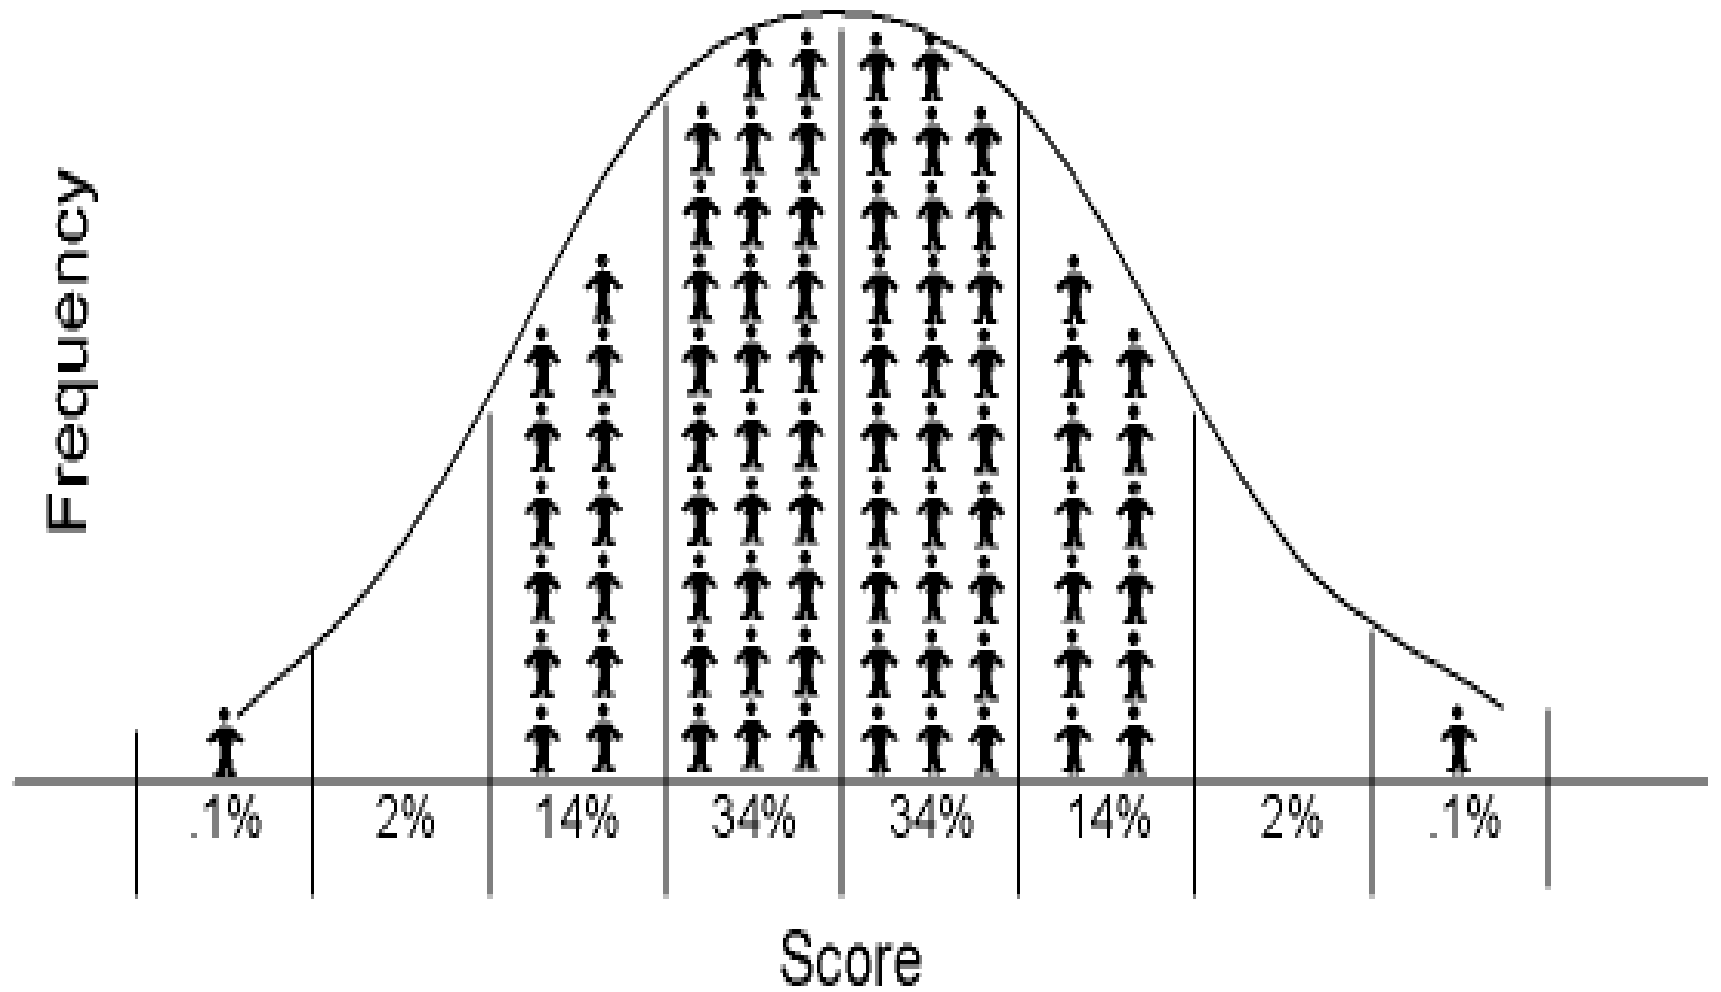

Follow-Up

- 84% participated fully
- 4% declined but agreed to continue later
- 2% could not be found
- 3% not able to participate, child out of home
- 4% school data only
- 3% requested to be dropped completely

Findings

(Intervention versus Control)

- Short term
 - Most aggressive children much less aggressive on the playground than counterparts
 - Teachers the year following the program rated children as more socially skilled than peers
 - Parents and children less negative with each other during observed family problem solving discussions
- Long term
 - Less police “detainment” during middle school
 - Less substance use during middle and high school

Aggression

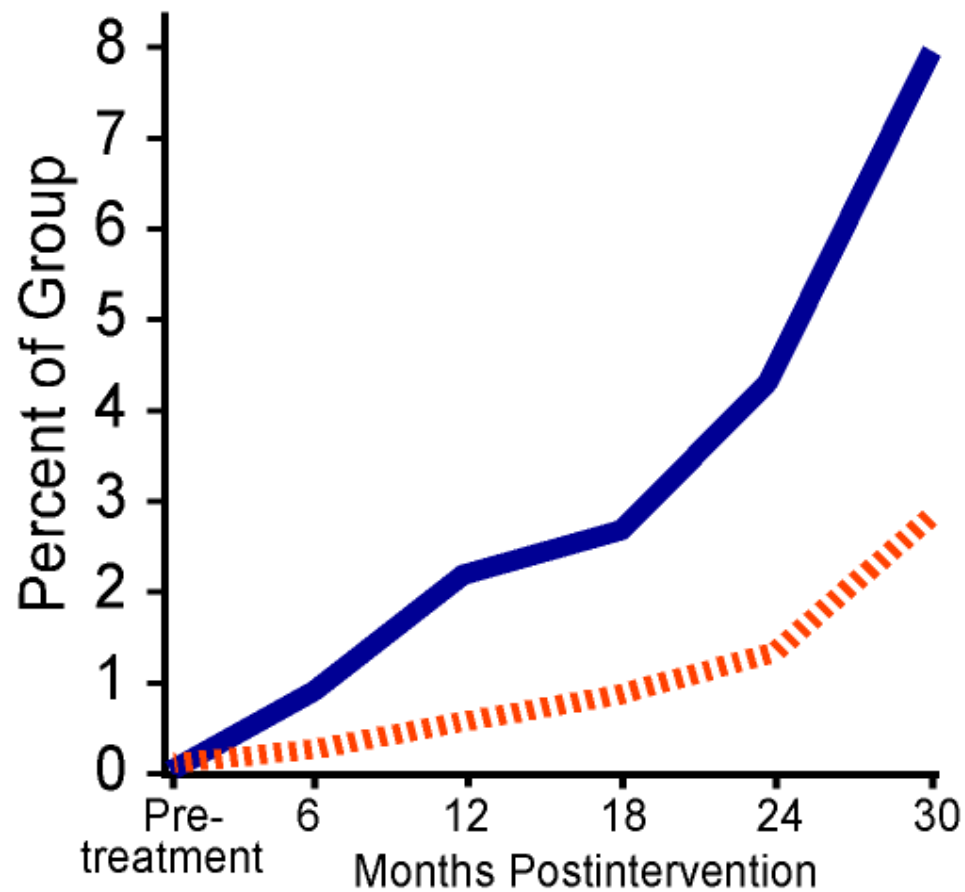

Pre-intervention

Post-intervention

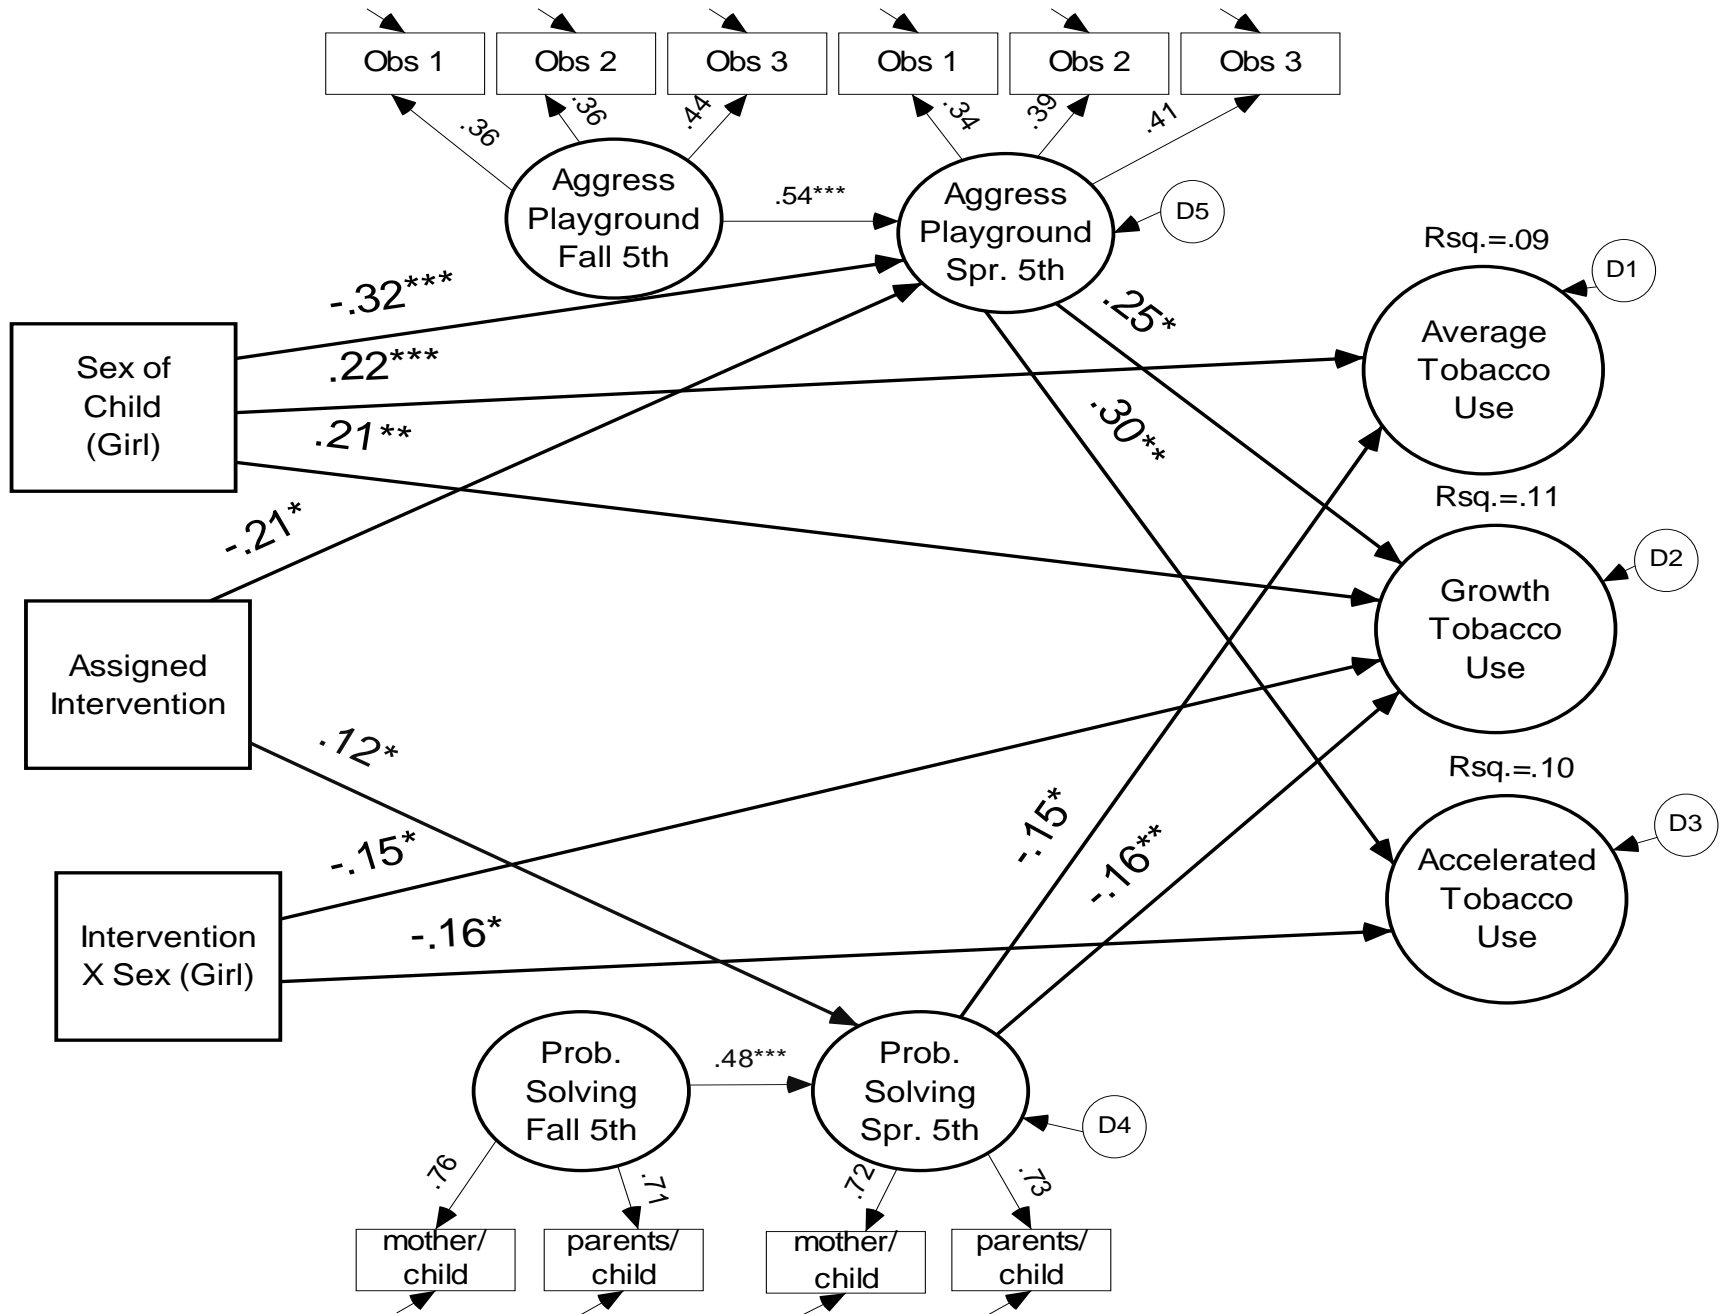

Cumulative Hazard of First Arrest

Control

Intervention

Proportional Odds Ratio = 2.4

Outcomes Due to Similar Interventions

Findings replicated in a wide variety of
samples

Treatment for Conduct Problems

- Review of Meta-Analyses
 - 2,000 studies
 - 100,000 children
- Impact
 - Behavior/cognitive-behavioral therapy .49
 - Multimodal therapy .47
 - Family therapy .41
 - Group-based therapy .26
 - Miscellaneous therapy .13

Social and Emotional Learning

- Meta-analysis
 - 213 programs
 - 270,034 children
- Impact

	<i>Post</i>	<i>6 Months</i>
– SEL skills	.57	.26
– Academic performance	.27	.32
– Attitudes	.23	.11
– Positive Social Behavior	.24	.17
– Emotional distress	.24	.15
– Conduct problems	.22	.14

Prevention of Conduct Disorders

- Meta-analysis
 - 45 programs
 - 9366 children
- Impacts
 - Behavioral programs .54
 - Multimodal programs .21
 - Cognitive-behavioral programs .13
 - Eclectic programs .03
 - Cognitive programs -.09

Prevention Along the Developmental Continuum

Part 1:

Parent Management Training

- Group-based
- 6 weeks
- 1 session per week for 2 hours
- Between session homework
- 1 check-in phone call per week
- Other calls as needed

Session Process

- Homework review
- Brief lecture
- Video clips
- Role plays
- Discussion

Session Content: First Grade

- Self-Confidence at Home and School
- Encouraging Cooperation
- Teaching New Behaviors
- Setting Effective Limits
- Parenting as a Process
- Successful Peer Relations

Session Content: Fifth Grade

- Self-Confidence and Encouraging Cooperation
- School Success
- Teaching New Behaviors
- Setting Effective Limits
- Communication and Negotiation
- Preparing for Adolescence

Example Session:
Setting Effective Limits

Video:
Limit Setting

Check-In Phone Calls

- Goals
 - Touch base on individual level
 - Engage parents in home practice
 - Offer support
 - Recruit for next meeting
- Process
 - Brief, supportive, encouraging

Phone Call Format

- Greet
- Refer back to home practice – individualize
- Look for weakness and coach
- Check in on requests – clear and specific, when have child's attention
- Look for success and encourage

If Tried, but Problems

- Describe problem specifically – how often has behavior occurred, what has parent tried so far
- Offer suggestions – refer back to group, the videotape, the homework as possible

If Not Tried, Troubleshoot

- Help think through a time that would work
- If haven't started because want to be consistent, praise sensitivity and offer to continue checking back

Part 2:

School-Home Communication

- Invitations
 - Letter 4 weeks prior
 - Phone call 2 weeks prior
 - Reminder phone call day prior
- Weekly newsletter
- LIFT Line

LIFT Line

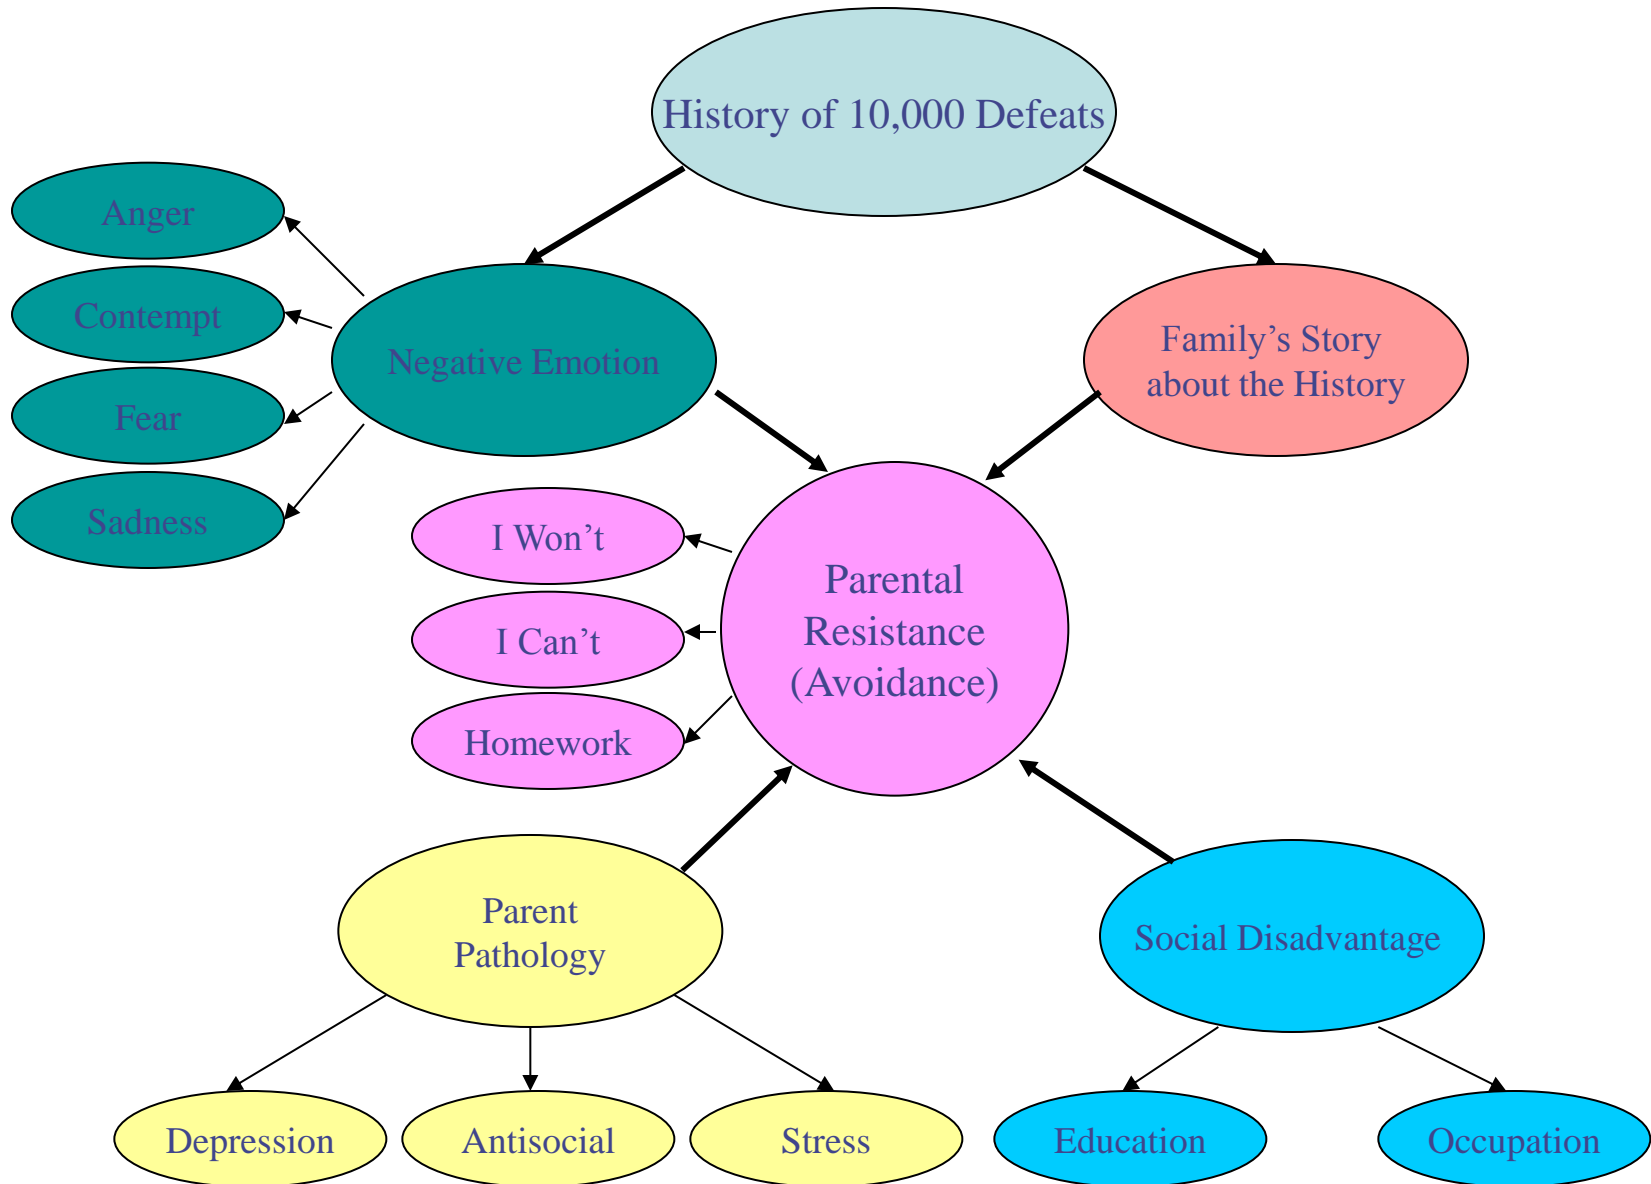

- Study done during pre-cell phone days
- Direct phone line and answering machine in each class
- Teachers leave new message each week highlighting any activities, special homework, notable issues
- Parents call, listen and leave message if desire

Theory of Action

LIFT

Session 3. Child Directed Components

Video:
News Clip

Part 1: Child Social Skills and Problem Solving Training

- Group-based
- 10 weeks
- 1 new content session per week
- 1 class meeting/problem solving session per week

Session Process

- Brief lecture
- Small group activities
- Large group activities
- Role plays
- Discussion

Session Content: First Grade

- Rules
- Listening
- Identifying Feelings
- Listening/Asking Questions
- Compliments
- Predicting Feelings
- Following Rules and Taking Turns
- Dealing with Teasing and Criticism
- Joining a Group and Including New People
- Responding to Closed Groups

Session Content: Fifth Grade

- Team building
- Study skills
- Listening
- Listening/Responding appropriately
- Feelings
- Giving support
- Cooperation
- Joining a group/Including new people
- Dealing with anger
- Problem solving/Cooperation

Example Session:
Dealing with Teasing and Criticism

Part 2:

Playground Behavior Game

- Tied to training sessions
- Additional staff out during recess
- Task is to move around and encourage positive behavior and note negative behavior
- Designated person to respond to high level negative behaviors
- Debrief, rewards

Theory of Action

LIFT

Session 4. Putting It All Together

Video:

Flight

<http://www.youtube.com/watch?v=MoDnY2qCA6Q>

Instructors

- All walks of life
- All education levels
- Experience with children and parents a must
- Engaging, attentive, enjoys people
- Ideally has experience in teaching parent education and is open to new models

Training

- In approach to the problem
- In basic skills needed for sessions, Playground Behavior Game, parent phone calls, interaction with teachers and school staff, school protocols
- Practice key parts of each session
- Practice leading discussions

Supervision

- Weekly team meeting
- Weekly individual meetings
- Regular supervisor visits to classroom, parent training, and playground

Multiple Modes of Delivery and Support

- Multiple times per week at different times of day
- Home visits to family as first backup
- Phone call to family as second backup
- Provide transportation assistance
- Food and child care during each session
- **Difference: 20% to over 90% coverage**
 - Offering parent groups not enough

In Practice

- School Climate
- Culture
- Practical

School Climate

Need Champions

- District-level
- Principal
- Teacher(s)
- School counselor
- School staff

Helpful to Have a Framework

- LIFT can serve as a compliment to school-wide efforts such as Positive Behavior Intervention Supports (PBIS)

PBIS Overview

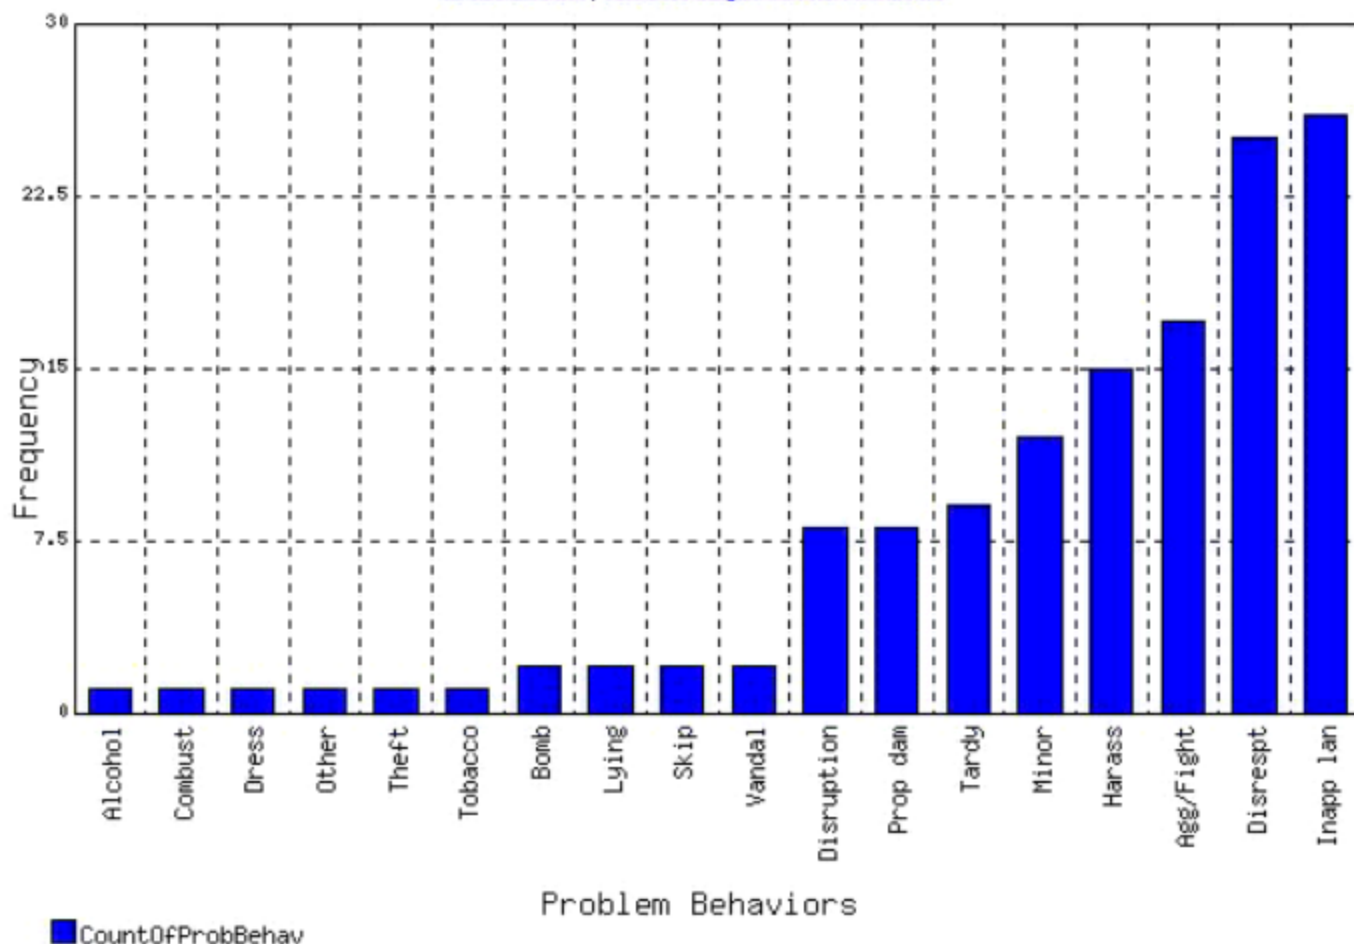

- Establish school wide rules and behavioral expectations
- Promote a set of positive values and behaviors about how we treat each other
- Recognize and reward students *and* adults!
- Use objective data to adjust the program and give feedback to school personnel and others
- Train and support staff, students and families over time (not just for a little while)

Frequency of Problem Behaviors

SWIS Demo School
 Generated: *May 2, 2001*
 From 2000/08/01 to 2001/05/02

[Main Menu](#) | [Return to previous location](#)

Problem Behaviors: 18

Referrals: 134

[grafici by simi.polito.it/perl](http://grafici.by.simi.polito.it/perl)

[Main Menu](#) | [Return to previous location](#)

PBIS Findings

- Decrease in discipline problems
- Increase in student sense of safety
- Increase in academic achievement
- Greater satisfaction in work for teachers
- Improved school organizational health

Culture

NUESTRAS FAMILIAS ANDANDO ENTRE CULTURAS

"Familia," Guadalupe, 17" x 20", S. Silva © 2010

Premises

- ▣ Families are the most important teachers children will ever have and must be at the center of prevention efforts
- ▣ Latino families in emerging immigrant states face unique challenge in raising successful children that relate to cultural contexts
- ▣ Many protective cultural factors are disrupted through acculturation processes

Overview

- ▣ Based on LIFT and related evidence-based programs
- ▣ Strengths based
- ▣ Family empowerment
- ▣ Therapist as “entrenador”
- ▣ Focus on practicing skills in session
- ▣ Family tailoring through trial and error
- ▣ Home practice
- ▣ Social support

Curriculum

- ▣ Latino Roots, Values, and Strengths
- ▣ Latino Parent and Spouse Roles
- ▣ Effective Family Communication
- ▣ Family Problem Solving
- ▣ Coping with Acculturation Stress and Conflict
- ▣ Giving Good Directions
- ▣ Skill Encouragement
- ▣ Discipline and Limit Setting
- ▣ Monitoring and Supervision
- ▣ Promoting School Success
- ▣ Dealing with Structural Barriers
- ▣ Planning for the Future

Example Findings

- ▣ Impacts for parents: Depression, marital stress, anxiety, general psychological symptoms.
- ▣ Impacts for parenting: Parenting impressions, homework engagement, encouragement, appropriate discipline, inappropriate discipline, monitoring
- ▣ Impacts for youth: Depression, homework performance, anxious/depressed, withdrawn, social problems, aggressive behavior, alcohol risk, illicit drug use, illicit drug use likelihood.

Practical Issues
